

## Project Design Phase-I Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID36751
Project Name	Gas Leakage Monitoring & Alerting System For Industries
Maximum Marks	4 Marks

### Solution Architecture:

Gas Leakage Monitoring & Alerting System for Industries has all the features as explained below

- The usage of the gas brings great problems in the domestic as well as working places.
- By the detection of the hazardous gas the alerting message reached to the person who control over it from the GSM
- The main objective of this project is that it is extremely accurate with least cost.
- This project system is the best to detect gas leakage and also warn people around by buzzer beep sound.
- An SMS is been send to the responsible person for preparatory safety cal
